A series of optional introductory lectures on the Clean Air Act, Clean Water Act, Endangered Species Act, Superfund, and the Toxic Substances Control Act on the Wednesday evening before the first full day of the course provide some grounding for newer attorneys and a refresher for more experienced attorneys.

In addition to more advanced presentations on the subjects covered during the introductory lectures, a faculty of more than 30 seasoned practitioners, federal government representatives (including the EPA, DOJ, State Department, and CEQ), law professors, and counsel and other professionals at advocacy organizations also bring you up-to-date on:

- Climate change in the U.S. and abroad post-Copenhagen
- Citizen suits and the latest government enforcement initiatives
- Congressional and Supreme court developments
- NEPA and environmental justice
- Endangered species and public lands
- Ethical issues
- Chemical management developments

The 40th anniversary presentation of this annual, advanced program, featuring over 16 hours of instruction, particularly looks at legislative initiatives, regulatory changes, and new precedent issued during the first year of the Obama administration.
